EUROPE'S FOOD SHORTAGE IS BIGGEST POST-WAR PROBLEM; HARVEST MAY NOT END WOES

AP World Traveler.

PARIS, March 21.—(P)—Europe's food shortage, which former President Hoover is here to investigate, presents a decidedly grim problem, complicated as it is by the fact that there is hunger in many other parts of the world.

Spring and early summer are going to be a critical time. This is in in-between period for crops.

But unfortunately the crisis isn't likely to end there. Although this first day of spring gives prouping of an early season for the tillers of the soil, it doesn't bring the cheer of normal times. The early vegetables will brighten the situation, but this will be a comporatively slight and passing relief.

One of the worst handicap's is a great shortage of fertilizer. The

The mass-meeting was called by the commissioners court following the presentation of petitions containing 832 names requesting this action be taken by the court.

Road Program.

There have been discussions of the need and desire of an improved program for farm-to-market roads in Navarro county for some time, and a concrete program is expected to be worked out at this mass meeting. Whether a bond issue will be sought or an increased levy for road construction without a bend issue is one of the principal questions to be solved at this meeting.

When In Need Of Assistance Just Ask The Sheriff

Sheriff C. O. Curington had two requests today that bordered on the odd one a courier duty, the other a lawman's lament. Enclosing a three-cent stamp, a Henderson county woman asked the sheriff to obtain for her the address of a member or the minister of a local church, Shewould appreciate very "mutch" the effort and offered reimburen ent

As the lawman termed his letter, it was a "sad story" of how he had staked an indvidual to \$10 when that person was on the latter that the ball was done. \$10 when that person was on the deficit side of the ledger due to the theft of his wallet. The lawn and diligently pursued the violator, but the wallet remained on the list of the unfound. The horrower has proved uncooperative in the matter of repaying the ten dollars.

The officer wants the sheriff to exert his influence so that it won't be necessary to get a warrant for the borrower's arrest. Genial Can Curington was

A similar view was expressed by Senator Ellender (D-La.)

"I don't see that much good would come out of a Big Three conference," he told a reporter. "We've had them before (on a smaller scale) and it seems that everybody misunderstands everybody else. I'd rather see things worked out through the United Nations Organization."

Senator Knowland (R-Calif) said it appeared that Pepper "wants to rely more on the actions of the Big Three than on the United Nationa." mittee the army estimates it will need 1.070.000 officers and men on July 1, 1947, to do its assigned

jobs...
There is strong sentiment in both senate and house committees for a six-month extension. However, some members advocate restricting any renewal to July 1 of this year.

It is hardly necessary to say that a great many American civilians are likewise uneasy, as they observe the militant and distant attitude assumed lately by some of our foreign friends. Uncle Sam, when left to his own devices, has always been notoriously careless and complacent regarding his own safety. Without pointing at any individual or group, it is proper enough to say that some dangers connected with the great wars recently fought are not yet abolished, and there are other troubles arising which though as yet "no larger than a man's hand," may need attention before they grow to much greater strength.

Here is a proposal, however, that seems to go back to first principles. The general idea is similar to that which has been undertaken after former wars, on the whole with rather good success, it comes from Herbert U. Nelson, executive vice president of the National Association of Real Estate Boards. It calls for grants of land in suitable locations, in proportion to the veterans' length of service. He lines up the proposal in this

"Veterans are coming back to a higher price level than they left. Under housing programs developed in Washington, all sorts of tinkering with the economy to force prices down are proposed. They won't work. These schemes are all trying to fit the economy to the veteran What we ought to do is to fit the veteran to the economy."

He thinks this could be done by the old-fashioned! procedure of "homestead grants," undertaken after nearly all of our wars.

On the other hand, the supply of bread grains, also far below demands of domestic consumers and of famine-plagued areas abroad, appears likely to be restored by another bumper wheat crop.

Should this crop turn out as favorably as now indicated, it might be possible for the government to end its present wheat conservation program by late summer.

The planting survey released yesterday had one particular dark spot. It indicated that the country may continue to be short of food fats and oils for possibly another year. Prospective acreage of soy beans and flax seed, principal sources of vegetable oils, are pal sources of vegetable oils, are considerably short of government goals.
Given favorable weather during

Tropical Diseases May Be Brought To U. S. By Veterans

DALLAS, March 21—(A)—Dr. W. Grady Reddick predicts that the effects of tropical diseases to which members of American armed forces were exposed will be felt in the United States for many years, but sees no need to fear new epidem-

Addressing the Southern Clinical Conference meeting here, Reddick, who is a member of the faculty of Southwestern Medical College and served in the Navy in the South Pacific, said that "diagnostic horizons must be broadened to include the diseases of the world."

Reddick foresaw malaria as the higgest troublemaker and Japanese Bee Encephalitis, a new type of brain fever, as the disease most to be feared. The latter disease carried by mosquitoes and the death rate is nearly 60 percent, he said, adding:

"Investigations on the West Coast have proved that mosquitoes native to the United States can transmit the germ to barnyard fowls, and from there it can be taken to animals and humans," Urging doctors to become "parasitic minded," Dr. Reddick said that many intestinal worms, almost forgotten in medical treatment in this country, lere found among the natives and troops in Pacific areas, but he added "I have seen more since returning to Dallas than I ever saw in the Pacific."

WACO COUNTY JUDGE STRONG ADVOCATE OF **UNIT ROAD SYSTEM**

ING OF ROTARY CLUB

A system of county road building which has survived without merit, 101 years was scored by Judge D. Y. McDaniels of Waco at a luncheon meeting of Rotary Club Wednesday at noon in the Navarra Hotal

Our commissioner form of oper-"Our commissioner form of openation is 161 years old and it operates the same that it did 101 years ago," he said, "A system is had which has many times proven its inefficiency. We have 140,000 miles of dirt roads in Texas, and we've been trying to eliminate them for more than a century."

them for more than a century."

Rural Road System.

"Texas' rural road system is a tragedy indeed." the county judge continued. "A tremendous amount of money is collected each year for the improvement of dirt roads, and yet we have no results to show. We spend enough money to hoast of an excellent rural system."

A unit-system of operation, which has been adopted successfully, in six Texas counties, was outlined by Judge McDaniels. Under his idea, the county does away with the four precinct plan, and operation, with the four precinct plan, and has one system of roads, one set of machinery, one repair shop, one county fund, one county engineer and one crew of employees. "As opposed to this centralized plan, there is not a single argument for there is not a single argument for the four-precinct set-up which has proven so inefficient. Commis-sioners are denied of no rights other than the fact they have only one set of equipment and em-

ployees."

Engineer Essential.

Judge McDaniels believes a county engineer is essential in the construction of roads. "Road construction is specialized work. Would a building without an architect? Nor should a county build a road system without an engineer."

Lodge of Texas, IOOF, and the 52nd Rebekah Assembly of Texas at Waco.

The grand lodge Monday approved plans for the rebuilding of the Home in Corsicana on its present site and the resolution passed empowered the board of trustees of the Home and Grand Lodge to underwrite the necessary \$75,000 as soon as the leve offering in progress over the state reaches the \$50,000 mark. (There is more than \$20,000 already in the bank credited to the fund and thousands of dollars were pledged at the grand lodge sessions while hundreds are reported to have been valiting until th formal action was taken before making their contributions.)

Dallas Retains Office,
Headquarters of the grand lodge will remain in Dallas when a resolution was passed declining to move headquarters to Waco.

Completion of the business sessions, installation of the new officers and the selection of the 1947 meeting place was scheduled Tuesday.

Latest Wage-Price

Both wages and prices will be allowed limited advances under the government's new wage-price policy, but the prospect for most Corsicanans is for slightly better prices on some items, and little, if any, wage increases. This conclusion is evident from

a cursory glance at the new regulation, issued by Chester Bowles, in his new capacity of Economic Stabilization director. The new plan calls for wage increases most-ly in huge manufacturing indus-tries, of which few are represent-ed here. On the other hand, the products of these industries will be allowed to rise in price, and these goods are for sale in Corsicana

it has been said the best abbreviation of the word "Selfishness" is "sin." If we divide it into its syllables "self-ish-ness"—and take the first letters of each syllable and put them together, sure enough we have the word "sin."

Selfishness is sin, vice versa. Any time a sin is committed, you can mark it down that the guilty party was thinking of his own selfish interests. He wanted to gratify one or more of the three base desires of man—the lust of the flesh, the lust of eyes, and the pride of life.

James asks, "Whence come wars and fightings?" His answer is the selfish desire of men to gratify their lusts. If the "Big Three" nations ever learn that selfishness does not pay, they will have no trouble maintaining friendship. If all men could see that point, troubles would vanish away as the mist before the sunrise.

Through worship we can learn how to give unselfish service to God and our fellows. Attend worship tomorrow and every Lord's day.
